energy you can trust

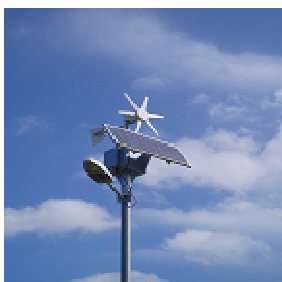

Volume 1 Issue 2

AT THE FOREFRONT OF RENEWABLE ENERGY

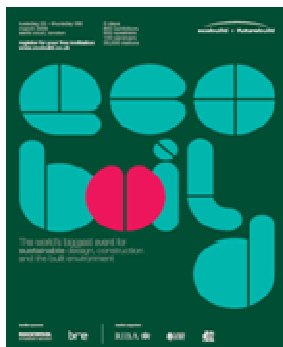

February, 2009

True News

- 1 True Solar Wind Street Lights
- 1.1 Would you like to reduce your energy bills?
- 2 Meet True Energy & Reegen at Ecobuild!

"We at True Energy have the technology to help you meet your CO₂ targets by 2020"
P.McVan – Managing Director

True Solar Wind Street Lights

The True Solar Street Light is the sustainable lighting solution for Communities, Multi-Use Games Areas, Car Parks and Walkways.

As one of the leading suppliers and innovators True Energy's Solar Street Lights provide an economical and reliable solution in the absence of a practical local mains power supply.

The lights require no electricity therefore negate the cost and disruption associated with installing a mains connection.

We Can Reduce Your Energy Bills!

True Energy along with our specialist associate 'Reegen' can help you!

- Improve environmental performance of buildings
- Improve internal environment for occupants
- & save YOU MONEY through the identification of energy saving technologies

True Energy LTD can supply a range of renewable technologies such as Solar Thermal Hot Water Systems and with our specialist associate Reegen help ensure you achieve the necessary BREEAM compliance.

Meet True Energy & Reegen at Ecobuild!

Reegen & True Energy are exhibiting at the Ecobuild exhibition from the 3rd to the 5th of March 2009!

Come and see us at stall GS6 in the Green Shoots area. Simply follow the link below to register for your **free Ecobuild ticket**.
