

Solar Thermal Installation

True Energy recently delivered a contract to supply Solar Thermal Hot Water Systems to three new build bungalows in South Wales.

Roof integrated flat plate collectors were installed to achieve an annual carbon saving of 600kg per bungalow.

Fluids circulating through collectors are heated by sunlight. This heat is transferred via coils into a hot water storage tank where the water is then readily available for everyday usage.

Solar Trade Association Badge Awarded to TRUE!

True Energy is now a proud member of the Solar Trade Association.

Solar Trade Association (STA) is the industry regulator for solar energy systems promoting solar thermal in the UK. Serving the public, industry and governmental bodies with information concerning national and international standards, new legislation and advances in technology

“By choosing a solar energy installation via STA members, you are assured of the highest quality and support” said the STA.

True Energy's specialist solutions include:

- True Solar Powered Street Lights - see our brochure <http://www.trueenergy.co.uk/resources/solar%20street%20lights.pdf>
- Ground Source Heat Pumps
- Small & medium wind projects
- Off-grid solar electricity systems
- Solar thermal systems for hot water
- Grid-connected solar electricity systems

True Energy provides a complete service including **Alternative Energy Advice and Systems Design.**
